PHARMACY VOCABULARY

English - Spanish - Italian - German

A multilingual reference sheet for pharmacists, pharmacy assistants and English learners.

The English wording follows the supplied source. Translations are adapted for professional pharmacy use; notes below clarify entries whose source wording is ambiguous, non-standard or repeated.

child	niño/a	bambino/a	Kind
adolescent	adolescente	adolescente	Jugendliche(r)
Peter is the best english teacher	Peter es el mejor profesor de inglés	Peter è il miglior insegnante d'inglese	Peter ist der beste Englischlehrer

Editorial notes

- hypodermic/ syringe is preserved as written; in practice, it usually means hypodermic needle / syringe.
- Salve/pomade is retained although it overlaps with ointment; both normally mean a semi-solid topical preparation.
- prospectus is translated here as the medicine information leaflet, not an investment prospectus.
- Micromedex, Lexicomp and Physician's Desk Reference are resource titles or named reference works; translations preserve their names where appropriate.
- Peter is the best english teacher is a source sentence rather than pharmacy vocabulary; it has been retained and capitalized in the translated versions.

For teaching and reference only. Medication decisions should always be checked against current local guidance and an authoritative medicines database.
